

DIVYANSHU NEGI

PROFILE

Dynamic web developer with a diverse background in software engineering and a strong foundation in full-stack development. Equipped with expertise in JavaScript, React, Git, and cloud computing, I have optimized multiple APIs and enhanced app ratings through improved UX. My future goals include advancing into a senior developer role, mastering AI/ML, and contributing to impactful projects. Adept at leading hackathons and developing innovative solutions, I strive to expand my technical skills and collaborate on challenging projects. My passion for automation and AI fuels my dedication to creating pioneering solutions and making a meaningful impact on the industry.

Skills

- Full-stack Development
- JavaScript
- React
- Git
- Cloud Computing
- API Optimization
- UX Improvement
- AI/ML Mastery

EMPLOYMENT HISTORY

VP of Engineering at Zaapi

May 2021 – September 2023

As the VP of Engineering at Zaapi, I led the development and implementation of cutting-edge technical strategies to drive company growth and success. I played a pivotal role in building the engineering team from scratch, establishing the entire tech infrastructure, and overseeing the front end and back end development. My contributions were instrumental in the company's substantial user base expansion, resulting in a high number of paying customers.

Sr Frontend Engineer at Delightree

October 2020 – May 2021

Divyanshu Negi

At Delightree, I served as a Sr Frontend Engineer, where I played a key role in developing and maintaining the front end of the company's projects. My contributions were focused on ensuring high-quality front end development, enhancing user experience, and driving the company's technological advancements.

Founder at Meralink

April 2020 – May 2021

During my time as the Founder of Meralink, I spearheaded the initiation and development of the company, leveraging my expertise to establish a strong foundation and direction for the business. My role involved leading the company's early-stage activities, including strategy formulation, project management, and overall business development.

EDUCATION

Bachelor of Technology, UTU

May 2009 – July 2013
